DETAILED ACTION

Response to Amendment

1. This Office Action is in response to Paper filed 23 September 2003. Claims 1-35 have been canceled. Applicant's addition of claims 36-51 is acknowledged. Claims 36-51 are under examination.

Withdrawal of Objections and Rejections

2. Applicant has cancelled all previous pending claims, therefore, all objections and/or rejections are withdrawn.

New Rejections

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 39-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 36, 42, 46 and dependent claims thereto are indefinite as the claims are directed to a method of purifying a protein however, the claims only recites the steps for loading a column. The method as recited is absent any endpoint, and thus the claim would appear to be incomplete.

Art Unit: 1653

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 46, 47, and 50-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Burton *et al.* (6,423,831). Burton *et al.* teach the purification of anionic protein neurotrophin and neurotrophin variants using hydrophobic interaction chromatography. Burton *et al.* teaches that the column is loaded with sample and that the loading sample preferably contains 2.5 M NaCl. Burton *et al.* additionally teach that 10% alcohol is added to the solution for elution. Thus, the reference anticipates the claimed invention.

Conclusion

7. No claims are allowed.
